

CAMPUSES
DESIGNWORKSHOP

2007

The Value of EXPERIENCE

Design Workshop fashions beautiful and functional campuses that play an equally vital role in an academic setting as in a corporate one. Well-planned and enticing university campuses attract and retain students and faculty and encourage the support of alumni and the surrounding community. Alluring corporate settings act as a magnet for quality employees, make an impact on investors and become an asset to the community. Our cross-disciplinary experience in land planning, urban design, landscape architecture and tourism planning provides the vision to create everything from vibrant, self-sustaining communities to engaging nooks for solitude. Our campuses enhance the quality of life, foster an atmosphere conducive to learning and working, promote social encounters and provide safe, efficient movement from place to place. Guided by the classic principles of place-making, we design environments where people can flourish spiritually, socially and economically in harmony with the natural environment.

While reinforcing the social and intellectual vitality of the community, we strive to conserve land resources, accommodate growth, achieve seamless transitions from buildings to open spaces and preserve the character of both regional and historical contexts. We address the details of pedestrian and vehicular circulation and parking, service and emergency vehicle access, entry and signage system design and appropriate lighting. Our proficiency allows us to reconcile diverse priorities, achieve timely approvals, set standards for long-term stewardship of the asset and create measurable and lasting value for the projects we undertake. We design campuses that are compact, walkable, vibrant and unforgettable.

The RELATIONSHIP

Design Workshop recognizes how personal the campus design process can be. It must define the vision of a variety of stakeholders. Though our vast experience in integrating all aspects of the process suggests a leadership position, we thrive in a collaborative environment. We listen, and by listening, we can anticipate demands and meet them in a timely and professional manner. We build relationships with our clients that are service-oriented, recognizing that our rapid response and attention to detail are necessary to provide them with accurate information in the complex decision-making process. Continuous feedback at every phase of development gives our clients, students, alumni and the community, the ability to examine viable alternatives and make decisions that ensure the ultimate success of the project. A talented team of professionals is selected not only for relevant skills but also for the ability to communicate effectively with the academic or corporate community. The result is a successful project and an ongoing, positive relationship.

The OUTCOME

Design Workshop is proud to have participated in the creation of magnificent educational and corporate campuses. Successfully combining aesthetic, economic, environmental and community values, these places honor their institutions' past and support their futures. They become legacies.

We invite you to contact us and we welcome the opportunity to enhance the quality of your project.
