

**RESIDENTIAL DESIGN  
DESIGNWORKSHOP**

# The Value of EXPERIENCE

Designing livable outdoor environments requires landscape architects to have the ability to interpret a client's vision, needs and desires into a unique and personal place. The merging of nature with artistic imagination fashions sanctuaries for discriminating homeowners. Through a thoughtful and creative design process, Design Workshop forms a connection between the site, the architecture and the landscape. Courtyards, gardens, water features, walls, groves of trees or simple plantings create places that work equally well for escape, solitude, simple pleasure or entertaining friends. The client's desires, combined with Design Workshop's experience, result in landscapes that provide physical, spiritual and financial benefit for the owner.

Our expertise is all-inclusive, from the initial plan of the site to the planting of the landscape. We assess soils, slope, access, climate, natural vegetation, wildlife, views and every opportunity to engage in sound conservation practices. We pay meticulous attention to detail, construction methods and best practices. Throughout the country, we have incorporated palettes of regional materials and have created landscapes rich with history. Our creativity, sensitivity, and artistic expression in residential projects have been honored with numerous national awards.

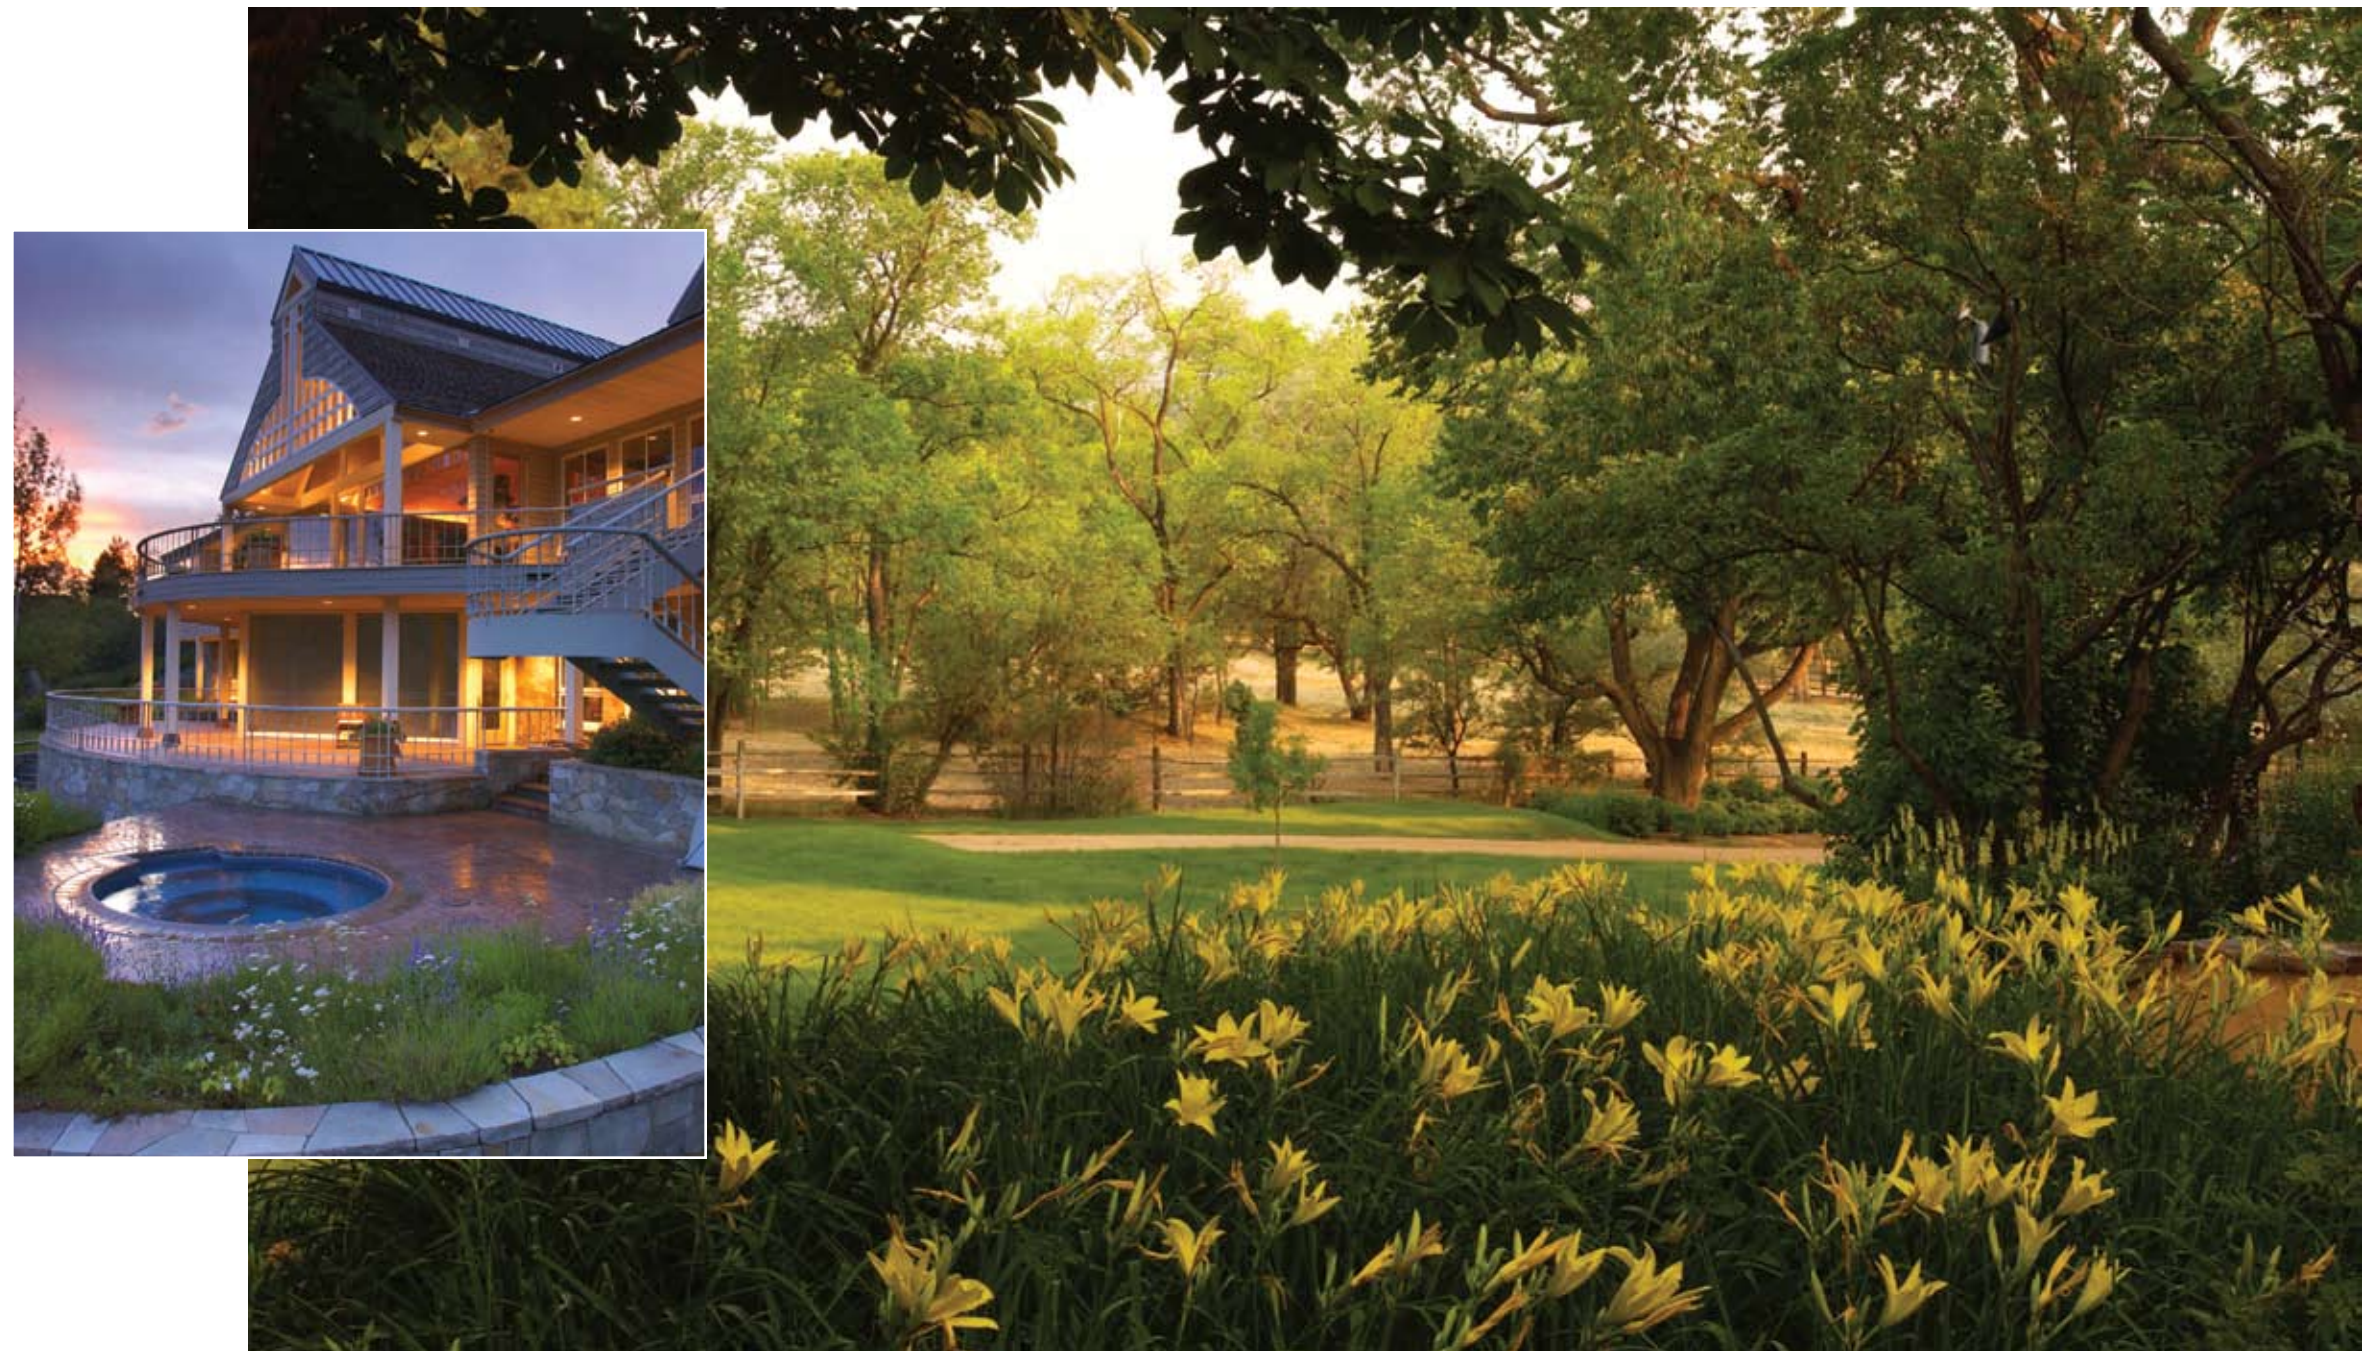

## The RELATIONSHIP

Design Workshop fully appreciates how personal the residential design process can become. We cultivate a collaborative atmosphere with mutual respect and excellent rapport. Our approach is to fully understand our client's goals and dreams and to resolve problems, aid in the decision-making process, negotiate with homeowners' associations or architectural committees and to make the experience pleasant and rewarding. We build relationships with our clients that are service-oriented, recognizing that our rapid response and attention to detail minimize frustration and provide them with accurate information for decision-making. Continuous feedback at every phase gives us a chance to discuss alternatives throughout the process. The result is a living landscape that is more than the client expected and a relationship that is positive and ongoing.
